selleck.elliott@gmail.com | (801) 427-1650 | linkedin.com/in/selleckelliott | github.com/selleckelliott

Backend engineer building C#/.NET REST APIs for loan servicing, payments, and compliance, plus Python/FastAPI systems. Prior experience as a Technical Financial Advisor.

TECHNICAL SKILLS

Languages & frameworks: C#, .NET, ASP.NET Core, Python, FastAPI, SQL, T-SQL

Backend: REST APIs, hexagonal architecture, Domain-Driven Design, SOLID, webhooks, Swagger/OpenAPI

Data & optimization: SQL Server, PostgreSQL, MySQL, query optimization, Salesforce integrations, OR-Tools

Cloud & delivery: Azure, Azure DevOps, Docker, Git, GitHub Actions, CI/CD, automated testing, pytest

PROFESSIONAL EXPERIENCE

Core Service Developer

2024 - Present

GoldPoint Systems | Orem, UT

- Designed and deployed C#/.NET REST APIs for loan servicing, payments, and compliance within an enterprise lending platform reporting 34.6 million loans serviced in the past year.
- Delivered a backend feature generating \$30K in incremental revenue while reducing downstream legal risk through improved compliance data handling.
- Centralized record lookup, logging, and error handling in a reusable helper supporting seven record types across six litigation and compliance API endpoints.
- Integrated Salesforce through REST/JSON APIs and event-driven webhooks to synchronize customer payment data, account updates, and CRM records.
- Diagnosed and resolved QA and production defects using SQL Server queries and automated test suites, improving stability and reducing recurring failures.

Technical Financial Advisor

2022 - 2024

CUSO Financial

- Developed internal advisory tooling that automated client portfolio modeling previously rebuilt by hand for each account.
- Wrote SQL queries and scripted spreadsheet models to join and reshape client, account, and holdings data for portfolio analysis.
- Integrated credit union account and holdings data into the advisory desk's analysis and reporting.
- Applied that tooling to grow assets under management by \$6MM in six months.

SELECTED TECHNICAL PROJECTS

FreightBid Agent

2026

Python, FastAPI, OR-Tools, scikit-learn | github.com/selleckelliott/freightbid_agent

- Engineered expected-value bidding that increased realized profit 32.8% versus the best fixed policy in simulation (\$314 versus \$236/load), outperforming fixed bidding across 10/10 broker-quality scenarios.
- Designed hexagonal ports and adapters that isolate the domain core from FastAPI, OR-Tools, and scikit-learn, with in-memory repositories for testing.
- Maintained 600 passing automated tests across domain rules, adapters, APIs, and simulation workflows.
- Optimized rolling 7-day route planning, improving cumulative profit 3.9% and reducing deadhead 4.7% across 150 simulated episodes.

CustodiFlow

2026

FastAPI, PostgreSQL, Render, Vercel | custodiflow-staging.vercel.app

- Developed a multi-tenant inventory SaaS prototype in FastAPI/PostgreSQL with QR scanning, reorder workflows, and site management.
- Implemented printable QR label sheets and compact PDF labels sized for handheld thermal printers.
- Automated supplier price-book updates to synchronize lowest per-unit inventory costs and generate supplier-grouped purchase lists.
- Deployed a demonstration environment on Render and Vercel with seeded tenant data and an interest form.

EDUCATION & CERTIFICATIONS

Western Governors University | Bachelor's - Business Marketing Management | 2019

Microsoft Certified: Azure AI Fundamentals (AI-900) | 2025
